1. Product and Company Identification

**Product Name:** Crackbond CSR-FLEX (Part A)  
**Product Use:** Concrete Repair

**Company Identification:**  
ADHESIVES TECHNOLOGY CORP.  
450 East Copans Road  
Pompano Beach, FL 33064  
Contact Phone: 1.800.892.1880  
(9:00a.m. – 5:00p.m. EST)

**Emergency Phone:**  
Chem-Tel: 1.800.255.3924 (24hrs)

2. Hazards Identification (Part A)

**GHS Classification**

<table>
<thead>
<tr>
<th>Health</th>
<th>Physical</th>
<th>Environmental</th>
</tr>
</thead>
<tbody>
<tr>
<td>Skin Irritant Cat 2</td>
<td>Not Classified</td>
<td>Toxic to Aquatic Life Cat-2</td>

<td></td>
<td></td>
</tr>
<tr>
<td>Acute Inhalation Cat 1</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Resp Sensitizer Cat 1</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**GHS Label:**

**Danger:**

- Skin Sensitizer
- Eye Irritant
- Skin Irritant
- Respiratory Sensitizer

**Emergency Overview**

May cause skin sensitization  
Causes skin and eye irritation  
May cause allergy or asthma symptoms or breathing difficulties if inhaled  
Wash skin thoroughly after handling  
Avoid breathing fume/gas/mist/vapors/spray  
Wear protective gloves/ protective clothing/ eye protection/ face protection  
Use in a well-ventilated area

**Primary Route of Exposure**

Eyes, skin and oral

**Carcinogenicity**

This product or one of its ingredients present at 0.1% or more is NOT listed as a carcinogen or suspect carcinogen by NTP, IARC, Prop 65 or OSHA.
3. Composition/Information on Ingredients (Part A)

</tbody>
</table>

4. First Aid Measures (Part A)

**Inhalation:** Move to fresh air; give oxygen if breathing is difficult. Call a physician if symptoms persist.

**Eyes:** Immediately flush eyes with plenty of water for at least 15 minutes. Call a physician if symptoms persist.

**Skin:** Remove contaminated clothing. Wash with mild soap and water. Get medical attention if skin irritation or dermatitis persists.

**Ingestion:** Give plenty of water. DO NOT induce vomiting. Call a physician immediately.

**Other:** Referral to a physician is recommended if there is any question about the seriousness of the injury/exposure. If sensitization occurs, future contact with the material should be avoided.

5. Fire Fighting Measures (Part A)

**Flash Point:** 199 °C (>390 °F)

**Flammable Limits:** N/A

**Extinguisher Media**
Carbon Dioxide, Dry Chemical, Water Fog

**Unusual Fire and Explosion Hazard**
None known. Thermal Decomposition can be formed.

**Special Fire Fighting Procedures**
Full emergency equipment with self-contained breathing apparatus and full protective clothing should be worn by firefighters. During a fire, MDI vapors and other irritating, highly toxic gases may be generated by thermal decomposition or combustions (see stability and reactivity). At temperatures greater than 400°F (204°C), isocyanates can polymerize and decompose which can cause pressure build-up in closed containers. Explosive rupture is possible. Therefore, use cold water to cool fire-exposed containers.

6. Accidental Release Measures (Part A)

**Personal Precautions:**
Avoid all personal contact. In enclosed areas, cleanup personnel should wear self-contained breathing apparatus.

**Environmental Precautions**
Dike spill to prevent entry into water system. Wear full protective equipment, including respiratory equipment during clean up. If temporary control of isocyanate vapor is required, a
blanket of protein foam (available at most fire departments) may be placed over the spill. Large quantities may be pumped into closed, but not sealed, containers for disposal.

Absorb isocyanates with sawdust or other absorbent, shovel into suitable unsealed containers, transport to well-ventilated area (outside) and treat with large amounts of water. Allow to stand uncovered for 48 hours to let CO2 gas escape. Clean up: Decontaminate floor with water, letting stand for at least 15 minutes.

7. Handling and Storage (Part A)

Containers should be stored between 64°F and 86°F. The shelf life for this product is 12 months. If container is exposed to high heat, 400°F (204°C) it can become pressurized and possibly rupture.

Empty Container Precautions - Empty containers must be handled with care due to product residue. Decontaminate containers prior to disposal. Empty decontaminated containers should be crushed to prevent reuse. Do not heat or cut empty container with electric or gas torch. Gases may be highly toxic.

Handling/Storage Precautions - Store in tightly closed containers to prevent moisture contamination. Do not reseal if contamination is suspected. Avoid contact with skin and eyes. Do not breathe aerosols or vapors. Warning properties (irritation of the eyes, nose and throat or odor) are not adequate to prevent chronic overexposure from inhalation. This material can produce asthmatic sensitization upon either single inhalation exposure to a relatively high concentration or upon repeated inhalation exposures to lower concentrations. Exposure to vapors of heated isocyanates can be extremely dangerous. Employee education and training in the safe use and handling of this compound are required under the OSHA Hazard Communication Standard.

8. Exposure Control and Personal Protection (Part A)

**Exposure Guidelines**

<table>
<thead>
<tr>
<th>Component</th>
<th>CAS#</th>
<th>OSHA PEL</th>
<th>TLV</th>
</tr>
</thead>
<tbody>
<tr>
<td>4,4'-Diphenylmethane Diisocyanate</td>
<td>13463-67-7</td>
<td>.02 ppm</td>
<td>.005 ppm</td>
</tr>
</tbody>
</table>

**Engineering Measures:** Use local and general exhaust ventilation to maintain airborne concentrations below TLV. Suitable respiratory equipment should be used in cases of insufficient ventilation or where operational procedures demand it.

**Personal Protective Equipment**

**Respiratory Protection**

Concentrations greater than the TLV or PEL can occur when isocyanates are sprayed, heated or used in a poorly ventilated area. In such cases, or whenever concentrations of isocyanate exceed the TLV or PEL, respiratory protection must be worn. A positive pressure, supplied air respirator or a self-contained breathing apparatus is recommended. In situations where isocyanates are not sprayed, heated or used in a poorly ventilated area, and a supplied air or self-contained breathing apparatus is unavailable or its use impractical, at least an air purifying respirator equipped with an organic vapor cartridge and particulate pre-filters must be worn. However, this should be permitted only for short periods of time (less than one hour) at relatively low concentrations (at or near the TLV or PEL). However, due to the poor warning properties of isocyanates, proper fit and timely replacement of filter elements must be ensured. Observe OSHA regulations.

**Eye/ Face Protection**
Wear splash proof chemical goggles/ full face shield if there is a potential for splashing.

**Skin / Body Protection**
Wear Suitable gloves (neoprene, nitrile rubber or PVC) and protective clothing to mitigate exposure.

**Other Protective Clothing or Equipment**
Use protective clothing which is chemical resistant to this material. Safety shoes and boots should also be chemical resistant.

Not Determined

**Acute Inhalation Toxicity:**
Not Determined

**Skin Irritation:**
Irritating to skin
The product has not been tested. The statement has been derived from the properties of the individual components.

**Eye Irritation:**
Irritating to eyes.
The product has not been tested. The statement has been derived from the properties of the individual components.

**Respiratory Irritation:**
Inhalation of vapors or mists may cause irritation to the respiratory system.

**Sensitization:**
May cause allergic skin reaction and irritation to the respiratory system.
The product has not been tested. The statement has been derived from the properties of the individual components.

**STOT – single exposure**
Not Determined

**STOT – Repeated Exposure**
Not Determined

**Carcinogenicity Classification:**
No Known Carcinogen

---

12. Ecological Information (Part A)

**Acute Toxicity for:**
**Fish:**
No Data Available

**Aquatic Invertebrates:**
48 hours LC50 for Daphnia magna 112-150 mg/L

**Algae:**
No Data Available

**Microorganisms:**
No Data Available

**Mobility:**
Considering the use of the substance, it is unlikely that significant environmental exposure in the air or water will arise.

13. Disposal Considerations (Part A)

If the material as supplied becomes a waste, dispose in accordance with federal, state and local regulations.

14. Transportation Information (Part A)

This product is not regulated as a hazardous material for transportation.

4. First Aid Measures (Part B)

Inhalation: Move to fresh air; give oxygen if breathing is difficult. Call a physician if symptoms persist.

Eyes: Immediately flush eyes with plenty of water for at least 15 minutes. Call a physician if symptoms persist.

Skin: Remove contaminated clothing. Wash with mild soap and water. Get medical attention if skin irritation or dermatitis persists.

Ingestion: Give plenty of water. DO NOT induce vomiting. Call a physician immediately.

Other: Referral to a physician is recommended if there is any question about the seriousness of the injury/exposure. If sensitization occurs, future contact with the material should be avoided.

5. Fire Fighting Measures (Part B)

Flash Point: 770-914°C (410-490°F)

Flammable Limits: N/A

Extinguisher Media
Carbon Dioxide, Dry Chemical, Water Fog

Unusual Fire and Explosion Hazard
None known. Thermal Decomposition can be formed.

Special Fire Fighting Procedures
Chemical; Carbon Dioxide; Water spray for large fires.

Special Fire Fighting Instructions- Use water to cool containers. Full emergency equipment with self-contained breathing apparatus and full protective clothing should be worn by firefighters.

6. Accidental Release Measures (Part B)

Personal Precautions:
Avoid all personal contact. In enclosed areas, cleanup personnel should wear self-contained breathing apparatus.

Environmental Precautions
Cover spills with sawdust, vermiculite, or other absorbent material to minimize spreading of the material before collecting.

7. Handling and Storage (Part B)
Handling: Avoid contact with eyes, skin and clothing. Avoid inhalation of vapors. Use with adequate ventilation. Use appropriate personal protection equipment (Section 8). Wash thoroughly after handling.

Storage: Store in a cool dry place away from direct sunlight. Keep from freezing. Recommended storage temperature range in between 64 °F (18 °C) / 86 °F (30 °C); Do not exceed 120 °F. Special Sensitivity: Opened containers should be protected with a dry air or nitrogen padding. A drierrite or silica gel drying system on the vents can also be used.

8. Exposure Control and Personal Protection (Part B)

Engineering Measures: Use local and general exhaust ventilation to maintain airborne concentrations below TLV. Suitable respiratory equipment should be used in cases of insufficient ventilation or where operational procedures demand it.

Personal Protective Equipment

Respiratory Protection
None normally required. Use a NIOSH approved organic vapor chemical cartridge respirator when air movement is inadequate to control vapor build-up.

Eye/Face Protection
Wear splash proof chemical goggles/ full face shield if there is a potential for splashing.

Skin / Body Protection
Wear suitable gloves (neoprene, nitrile rubber or PVC) and protective clothing to mitigate exposure.

Other Protective Clothing or Equipment
Use protective clothing which is chemical resistant to this material. Safety shoes and boots should also be chemical resistant.
