For over 20 years, the CONVERGENT name has been synonymous with innovation and has introduced multiple technologies that have changed the face of the industry – from Nano-Lithium® technology to industry-leading Reactive Silicon Hybrid Polymers to the all new silica-free STRiON® densifier.

Today, CONVERGENT products are part of a complete line of concrete repair, restoration, and new construction treatment solutions from Adhesives Technology Corporation. Whether you are focused on hardening concrete for heavy traffic, reducing dusting in a tilt-up environment, or installing a polished concrete floor to optimize light and reduce maintenance needs in a retail or warehouse environment, CONVERGENT products from Adhesives Technology provide the chemical solution that will satisfy the most stringent specification requirements and exceed your expectations.

ABOUT CONVERGENT

From manufacturing to application, we do our part to ensure that CONVERGENT products are safe to use and safe for the environment. Because we believe in building a better future, we’ve committed to being environmentally-minded from start to finish.

Our manufacturing facilities use streamlined systems and formulas that eliminate the creation of hazardous waste during the production process, and our warehouses package those products with recycled materials.

Unlike like other technologies that leave hazardous waste to be removed, Pentra-Sil absorbs deep into the slab leaving no residue or waste. It can be applied without the rinsing, and pickup and disposal which competitive products require. Just spray and walk away.

SUSTAINABILITY BENEFITS

Pentra-Sil penetrates deeper than sodium or potassium-based densifiers or hardeners, but more importantly, Pentra-Sil penetrates more evenly throughout the surface matrix of the concrete, with wider particle distribution during absorption.

By nature, sodium and potassium react violently in concrete. These rapid reactions create uneven clumps of unreacted calcium throughout the surface layer. These clumps form weak, erratic spots within the substrate. These weak unconsolidated clumps allow water to seep deeper into the concrete, where it has the potential to cause problems.

The high-tech chemistry engineered into Pentra-Sil products buffers these reactions, allowing the lithium to react more completely with the calcium compounds creating a denser, harder surface, leaving less unreacted calcium in the surface.

Pentra-Sil controls the reaction, forming denser, harder bonds, and far fewer unreacted calcium compounds.

Others tend to react violently with concrete, blasting clumps of unreacted calcium compounds throughout the surface layer.

Completed reactions with other densifiers form erratic bonds, increasing the risk of surface wear and tear, dusting and staining problems.

Scan to see our sustainability benefits and LEED credits.
Pentra-Sil® (244+)
SALT BLOCKING, DUST-PROOFER, HARDENER, DENSIFIER AND SEALER

Pentra-Sil® (244+) is a high-performance lithium hardener, densifier and sealer. It is formulated to protect existing concrete against damage from salt, freeze-thaw, moisture and steel corrosion. Pentra-Sil® (244+) reduces chloride ion intrusion, dustproofs, hardens and fortifies the surface. It is easy to use and VOC compliant.

- Engineered for parking and maintenance facilities
- Protects against salt and freeze/thaw damage
- Hardens, densifies and dust-proofs
- Used for polishing producing unrivaled results in shine, clarity and abrasion resistance when used together with Pentra-Finish
- Uses patented Nano-Lithium® technology
- Easy to use, low odor, no rinsing required
- Defends against water and harmful substances
- Not susceptible to UV damage
- Breathable: allows moisture to escape without damage to the surface
- Penetrates: no film to lift or peel off
- Reduces efflorescence and surface sweating
- Does not contribute to surface ASR or promote crazing
- VOC compliant, may contribute to LEED points (IEQ credit)

**STRiON:FORTIFY MAX**
THE HIGHEST PERFORMING, EASIEST TO USE DENSIFIER ON THE MARKET. THE NEXT EVOLUTION OF THE STRiON TECHNOLOGY.

Not only is it remarkably easy to apply, but it can be applied at temperatures as low as 25°F – and no rinsing is required, making it not only simple but also easy on the environment. It can be applied to freshly placed concrete and tilt-up construction slabs, and it can also be used on existing concrete surfaces and cementitious overlays as well.

**STRiON:FORTIFY**
REVOLUTIONARY SPRAY-ON, SILICA-FREE DENSIFIER

STRiON:FORTIFY is a revolutionary new method of concrete densification and hardening. Using groundbreaking new silica-free technology, STRiON relies on an ionic transfer process to disperse deep into concrete to make it more resilient, resistant to traffic, dustproof, easy to clean and prepped for polishing. On top of that, it’s exceptionally easy to apply. It’s a safe bet to get the job done right.

Pentra-Sil® (HD)
WATER-BASED LITHIUM DENSIFIER FOR MAXIMUM HARDENING

Pentra-Sil® (HD) is a high-performance lithium densifier that provides optimal hardening to improve abrasion and stain resistance and reduce dusting. Easy to use. Provides easier maintenance and longer concrete life. Pentra-Sil® (HD) is best for existing concrete surfaces and can be applied during polishing processes. This product is VOC compliant.

Hydraloc™ (CH)
IMPREGNATING COLLOidal HARDSener AND DENSIFIER

Hydraloc™ (CH) is a colloidal hardener/densifier treatment for newly placed concrete, polished concrete and natural stone surfaces. This unique chemistry of nano-sized colloidal silica particles penetrates deeply into concrete surfaces to provide an extremely dense and hard floor. Hydraloc™ (CH)’s proprietary blended technology enhances abrasion resistance and reduces dusting with one simple application.

Pentra-Sil® (H)
SINGLE-APPLICATION HARDENER FOR SLABS AND TILT-UP

Provides maximum hardening for concrete slabs and tilt-up construction. This lithium-based product reduces dusting and makes the surface more water, stain and abrasion resistant while increasing surface sheen over time. Pentra-Sil® (H) is applied in one application, will not peel, and no rinsing is required.

Hydraloc™ (IH)
IMPROVES GLOSS AND CLARITY IN POLISHING

Specifically designed for concrete polishing. Applied during the polishing process, this penetrating hardener improves the final appearance by allowing abrasive tooling to work more effectively to increase gloss and clarity. It is extremely easy to apply and will not skin, discolar or leave white blemishes.

**PROPERTIES**
- **Total solids**: 5.8%
- **pH**: 11-12
- **Color**: Opaque, dries clear

UNIQUE STRENGTHS, UNMATCHED PERFORMANCE.
**Pentra-Sil® (HL)**

**HYBRID LITHIUM DENSIFIER AND HARDENER**

Pentra-Sil® (HL) is a high-solids blended hybrid lithium densifier designed for concrete densifying and hardening in newly placed or existing slabs. Its reactive formulation fills the micro-pores of the concrete, strengthening the surface and prolonging its life. Pentra-Sil® (HL), when used in the polishing process, will deepen clarity and increase reflectivity, while remaining breathable.

**Pentra-Cure™ (MH)**

**ALL-IN-ONE CURE, HARDENER AND DENSIFIER**

Pentra-Cure™ (MH) is an eco-friendly, all-in-one treatment that cures, hardens and densifies fresh concrete with one application. It provides long-term protection for commercial and industrial floors against heavy wear and abuse. This unique solution forms a membrane on the surface that retains moisture for proper curing while the densifier penetrates and creates an abrasion resistant surface. Its lithium-based solution is VOC compliant and easy to apply.

**Pentra-Shield™**

**CONCRETE HARDENER WITH ANTI-SCALE AND FREEZE-THAW PROTECTION**

Pentra-Shield™ is an exterior concrete and masonry surface hardener and densifier that provides freeze-thaw, scaling and spalling protection. This treatment strengthens concrete sidewalks and driveways to minimize damage caused by winter weather. Pentra-Shield™ is a penetrating, breathable solution that reduces moisture absorption and leaves no surface film or discoloration. It is a lithium-based solution, VOC compliant and easy to apply.

**INNOVATION TIMELINE**

- 2000: Nano-Lithium technology created, trademarked, and introduced
- 2001: Pentra-Guard HP introduced – First micro film “Guard” on the market
- 2002: Pentra-Sil 244+ introduced as the highest performing densifier in the market
- 2005: Pentra-Pel (SI) launched
- 2008: Pioneering Colloidal Densifier Chemistry introduced (patent issued in 2014)
- 2010: Convergent joins Meridian Adhesives Group
- 2014: Strion:Fortify MAX launched as most abrasion resistant densifier in the market
- 2018: COLORFAST line of coatings & sealers launched
- 2021: Strion:Fortify launched as industry’s first Silica-Free densifier
- 2022: Hydraloc (CH) colloidal densifier and Pentra-Sil (HL) blended densifier launched
- 2023: Pentra-Shield ™ introduced – First micro film “Guard” on the market
Pentra-Finish™ (HG)
HIGH-GLOSS, FAST-DRYING LITHIUM SEALER

Pentra-Finish™ (HG) is an advanced, high-gloss, fast-drying lithium sealer that creates a microfilm on polished concrete, stone, terrazzo, masonry and other cementitious surfaces. This easy-to-use finish increases shine, enhances color and improves resistance against abrasion and stains. Pentra-Finish™ (HG) generally increases the coefficient of friction on polished surfaces. This non-toxic solution is ideal for integrally colored, dyed and stained polished concrete and is VOC compliant.

- Prolongs shine of polished concrete
- Delivers rapid gloss with increased abrasion and stain resistance
- Uses patented Silicone Reactive Lithium chemistry (Sire®Li)
- Keeps dirt and contaminants from penetrating
- User friendly: dries in minutes with low odor
- This product will not alter the profile of a surface
- Forms a protective microfilm that is breathable, hard, and will not peel or flake
- VOC compliant, may contribute to LEED points (IEQ credit)

**PROPERTIES**

- Total solids: 21.4%
- pH: 11-12
- Color: White, dries clear
- Odor: Slight ammonia-like odor
- VOC Content: <50g/L

**COLORFAST™ Finish**
CLEAR, HARD PROTECTANT FOR STAINED OR COATED SURFACES

COLORFAST™ Finish is a high-performance finish that enhances the appearance and extends the longevity of polished, integrally colored, dyed and stained concrete, providing shine, stain resistance and abrasion resistance. Effective on concrete and cementitious surfaces that are stained or coated, this water-based, lithium-fortified product dries quickly to a clear, extremely hard micro-coating that bonds with and protects the substrate. COLORFAST™ Finish will not lift or peel from the surface.

**Pentra-Pel™ (SI)**
INTERIOR / EXTERIOR PENETRATING STAIN GUARD

Pentra-Pel™ (SI) is a penetrating lithium stain guard designed for interior or exterior concrete, stone and masonry surfaces. This product creates a protective barrier that resists staining. It densifies, seals, and repels while maintaining breathability and doesn’t alter the appearance of the substrate. Pentra-Pel™ (SI) is easy to use and is VOC compliant.

**Pentra-Clean™ (CR)**

**HARDENS FLOORS WHILE IT CLEANS AND RESTORES**

Pentra-Clean™ (CR) cleans floors by cutting through dirt, grime and residue while using reactive Nano-Lithium® to harden, protect and restore gloss and durability. Cleaning with Pentra-Clean™ (CR) increases the floor’s longevity, reducing maintenance and costly repairs. Ideal for cleaning commercial, retail, industrial and institutional floors.

**COLORFAST™ Stain**

**INTERIOR/EXTERIOR LONG-LASTING STAIN**

COLORFAST™ Stain is a chemically reactive, Nano-Lithium® enhanced product that creates beautiful, durable colored concrete. High-solids treatment utilizes lithium densifier to harden and protect both interior and exterior slabs. COLORFAST™ Stain is an ideal solution for all construction phases and maintenance projects that require superior and enduring color, as well as protection against UV radiation, water intrusion, aggressive chemicals, abrasion, and corrosion. Comes in nine standard colors; custom colors are available on request (at minimum order quantities). COLORFAST™ Stain is low in VOC’s, environmentally friendly and has a very low polymer odor.

**AVAILABLE COLORS**

- Sand

The combined use of Pentra-Sil® C&N followed by application of Pentra-Sil® AC is an effective system solution to common, costly ASR and efflorescence problems.

**Pentra-Sil® (AC)**

**ALKALINITY CONTROL HARDENER**

Pentra-Sil® (AC) is an advanced alkalinity control treatment that reacts with concrete to neutralize its pH levels. Through this permanent reaction, slab sweating and efflorescence is significantly reduced. The lithium silicate in this product also densifies and hardens the surface, increasing abrasion resistance.

**PROPERTIES**
- Total solids: 7.4%

**Pentra-Clean™ (DC)**

**DAILY CLEANER**

Pentra-Clean™ (DC) easily removes stains, dirt, grease and grime from concrete, terrazzo, natural stone and tile floor surfaces. This product is easy to use, leaves no film or residue and has a neutral pH with no ammonia, alcohol or acid.

**Pentra-PCF**

**LIQUID PORE AND MICRO-CRACK FILLER FOR USE DURING GRINDING AND POLISHING**

Pentra® (PCF) is an industry-leading liquid pore and micro-crack filler for concrete grinding and polishing. This reactive treatment mixes with the dust created during concrete grinding to fill pinholes, microcracks and other imperfections in the concrete surface. It cures into a durable surface that will accept colored stains, dyes and hardeners.
