Subject: Notification of Product Status
NP26-10047 ULTRABOND HYB-2CC
By: Adhesives Technology Corp

Dear Renee Thomas:

The North Carolina Department of Transportation has reviewed the forenamed product and assigned a status of **"Approved for Provisional Use"** to product NP26-10047 ULTRABOND HYB-2CC (Epoxy Type I) on the Department's Approved Product List (APL). This status means the product may be approved for use based on site specific and/or project specific conditions being met. The specific provision for this product being **full approval can be given once this product has completed AASHTO PEAS testing**.

An approved status does not infer the product will be used in NCDOT projects or that the products will be actively promoted by the Department. It will be your responsibility to market your product. If the product is changed for any reason, or is not performing effectively, the product status will be changed accordingly. This letter does not satisfy material certification requirements for products specified in NCDOT's Standard Specifications.

Additionally, you must recertify your product on an annual basis by the 31st of January. If a recertification is not received by January 31st, the product will be removed from the Department's Approved Products List (APL). Recertification Notices with detailed requirements will be sent out in December of each year. If at any time, contact information has changed, you must inform this office.

Please do not hesitate to inform us of any other products that may benefit the Department. If you have questions or comments, I may be reached at 919-329-4074 or via e-mail at: productevaluation@ncdot.gov.

Sincerely,
